## CATTLE CO.

Saturday, March 2, 2024  
1:00 P.M. CST

**Bull viewing open house 8:00am**  
White Gate Cattle Co. farm - 1 mile south, 1  
3/4 miles west of Willey - 22166 270th Street,  
Carroll, IA

**Steak Lunch starting at 11:30am**  
Grit - Willey, 401 260th Street, Carroll, IA  
starting at 11:30am and available  
until sale time at 1pm

Welcome to our 4th annual auction from our farm and home town of Willey, Iowa. We sincerely thank you for your interest in our program. For the past 15 years we've focused our efforts on testing and developing our herd to produce real world cattle that bring profit to commercial cattle producers. We're excited to add Feed Efficiency testing to this year's set of fall bulls. It is our belief that in general, cattle have enough size today, we just need to make them better and more efficient. With that target in mind, we're excited about this sale offering and look forward to hearing how their calves perform on your operations. Please don't hesitate to contact us down the road with any questions or concerns. We love talking cattle and the beef business and look forward to working with you for years to come.

**FEED EFFICIENCY DATA  
AVAILABLE ON BACK INSIDE COVER.**

**White Gate Cattle Co.  
Brian & Kellie Brenny  
22166 270th St.  
Carroll, IA 51401  
(515) 231-4804**

**Terms and Conditions:** Terms of sale are cash or check. Please settle for cattle promptly. Cattle are sold under terms and conditions as recommended by the American Angus Association.

**Herd Health:** The cattle are on a complete health program and are up to date with vaccinations, have been dewormed, and will have two rounds of scour guard on the spring bred heifers. Breeding Soundness Exams will be completed on the bulls along with pre-breeding and pinkeye vaccinations prior to sale. The bulls are virgin bulls or have passed a negative trich test prior to sale.

**Guarantee:** All bulls selling for \$3500 or more are guaranteed against breeding injury for the first breeding season. Breeding season is defined as the 90-day period following the first turnout of the bulls. If a replacement bull is available, he will be provided, or if the buyer prefers, credit toward the following year's sale will be given, less salvage value of \$1250. Please notify us as soon as possible should injury occur and prior to the injured bull being sold for salvage. Claims must be made by September 1, 2024, and require a copy of veterinarian inspection to determine injury. Should the bull die, however, he will not be covered under any guarantee. We recommend the purchase of livestock mortality insurance to mitigate this type of loss. White Gate Cattle Co. is not liable for more than the net purchase price of the animal being sold.

**Liability:** All persons who attend the sale or open house do so at their own risk, legal or otherwise, for their safety or for the behavior of the animals. The owners and staff assume no liability for property loss or accident that may occur.

**Retained Interest:** White Gate Cattle Co. is retaining a 1/3 revenue sharing interest on all bulls unless otherwise stated, and the right to collect semen for within herd use at time when convenient for the new owner. Full possession and full salvage value sell. Any exceptions will be provided in supplemental information prior to sale.

**Delivery and Pickup:** Free delivery within the state of Iowa, and we will make every effort to help assist with trucking arrangements outside of Iowa. Will contact in the later part of March to arrange delivery times and dates this spring. \$100/bull discount for pickup. All cattle must be paid for before leaving the farm.

**Announcements:** Announcements on the auction block will take precedence over any other publications. Supplemental information on the bulls will be provided at the sale as well as [liveauctions.tv](http://liveauctions.tv). [www.liveauctions.tv/auction/3469/detail](http://www.liveauctions.tv/auction/3469/detail)

**Online Bidding:** Online bidding will be available at [www.liveauctions.tv](http://www.liveauctions.tv) as well as updated videos on all animals selling. For more information, please reach out.

EPDs contained in the hard copy of this sale book were current as of print date. Digital versions of this sale book can be viewed online at [www.angus.org](http://www.angus.org) and will have EPDs updated every Friday with the exception of EPD references in footnotes and photos. Any PDF downloads from the website will contain EPDs current as of the date downloaded. References: American Angus Association®, AHIR®, AngusLinkSM, CAB®, Pathfinder®.

• This bull will leave behind calves tough to beat in terms of profitability no matter how you sell them. 2039 was a standout in the fall set of bulls in every area measured including feed conversion with an adjusted feed to gain of 3.63 to 1. His dam is an exciting young cow we purchased from the TC Ranch as a heifer in 2019, whose first three calves have been high performing bulls including WGCC Visionary 0022, who sold in our 2022 sale, and sired lots 4 and 6 in this offering.

• We have loved the Accelerate sons with their excellent phenotypes, consistent performance, and proven feed efficiency genetics. Another bull that posted an adjusted feed to gain of 3.83 to 1. To put in perspective, these bulls converting in the 3's would have put on 600 lbs. of gain for over \$200 less than the estimated industry average.

## 3 WGCO PROCLIMATION K266

• Another ½ brother to our Lot 1 bull that stacks a ton of proven performance and efficiency. When I think of genetics we'd love in the feed yard, it's hard to not get excited about this bull. His sire produced three top bulls in this calf crop for performance and feed to gain. K287's mother is out of my father-in-law's favorite proven red cow we purchased from Iowa State. He says she couldn't turn around in his shop. This cow family is exactly what we strive for in performance carcass cattle.

• A great combination of carcass and maternal strength would describe this bull as he stacks Southern Charm with one of our most proven donor cows. His dam's calves excelled for growth and carcass traits in the competitive TC Ranch herd in Franklin, Nebraska, where we purchased her in 2019. She is a picture-perfect cow in terms of broodiness and udder quality along with excellent foot and leg structure at 10 years of age.

• We can't say enough great things about this bull. He was a 61 lb. calf from a first calf heifer we purchased from Ruby Cattle Company in Murray, Iowa. You won't miss him in the yearling pen of bulls as he's very stout, well balanced, wide based and stands on a great set of feet and legs. We can't wait to see the calves he leaves behind with an exciting combination of maternal, performance, and carcass genetics.

• I could have almost cut and pasted the description from Lot 18. A Lover Boy son going back to the same TC Ruby Cow family with Duff New Edition and Meyer 734 stacked into the bottom side of the pedigree. L153's calves should perform and leave behind some excellent females to build a herd around.

# Bred Females

WGCC Ellie 2029

## The Females

I know we have selected the right set of replacement heifers for this sale when the thought of letting them go brings a little pain. These females come from the heart of our replacement pen and will become great brood cows. With that in mind, we'll post details of any embryo interest retained in our supplemental information on LiveAuctions.TV prior to sale.

• Excellent performance in an easy fleshing package. She is just like her 2018 born mother we purchased as a heifer from the TC Ranch in Franklin, Nebraska. We left this fall heifer open for this sale with our spring calving customers in mind

Feed Efficiency (F:G) = pounds of feed dry matter consumed to gain 1 lb. of live weight. A lower value is desired.

RFI (Residual Feed Intake): This is defined as the difference between actual feed intake and that predicted on the basis of the animal's gain and maintenance requirements for its body weight. An average animal would have an RFI of "0". Animals with a negative RFI value are favored because they have consumed less feed for their weight and gain than the average of their herd mates.

R-ADG (Residual Average Daily Gain): This is defined as the difference between actual weight gain and the gain predicted on the basis of dry matter intake, maintenance of body weight and fat cover. An average animal has an R-ADG of "0." Animals with a positive R-ADG value are favored because they have higher daily gains for the amount of feed consumed and their body composition (% fat.)

(cited from Iowa Beef Center/Iowa State University "Phenotypic Feed Efficiency" October 2010)
